Dear Tony.

I wish to thank Aereco Ventilation Ltd for the assistance given in the ventilation of Housing Association project of 23 apartments in Cardiff known as Inn On The River.

Heatforce is a company that has specialised in the heating and ventilating of domestic properties in Wales for 30 years but has not previously had the opportunity to fit Aereco products.

My Contracts Manager, Nigel Pickering, informed me that the 15 - VAM767 fans and the 8 - V4A fans all controlled by the none powered humidistat ceiling grilles, BXS 925 and BXL 887, were quick and easy to install as the only electrical wiring required was a simple twin and earth to the fan.

Your technical office at Coventry not only designed the ventilation system but also provided the additional onsite support that is required on Design and Build projects, in addition to this I found that your pricing and overall services were better than other major fan manufacturers that were quoting for the project.

Heatforce is a respected contractor in Wales and I would have no hesitation in asking Aereco Ventilation to quote for any future projects.

Thanking you again and looking forward to our two companies working together on future projects.

Yours faithfully

Paul Maddocks
Managing Director
Heatforce (Wales) Ltd.
